

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. I presently own the Delphi Roady and SkyFi receivers as well as the Delphi portable docking station the has on one side a CD player as well as AM and FM radio....the other side has the SkyFi docking station. This allows me a REAL freedom of choice.....I do use this system to turn off my XM and the AM on so I can listen to the Cincinatti Reds play ball. I use the Roady in my car and on the way to and from work.....knowing what time the local news comes on...I switch to AM at 5:00 AM when leaving home for work to catch the local news and weather. At 6:00 AM I switch to an FM station for the news and weather.....coming home at night I switch on an FM station about 3:35 for the local news.....and have to listen to a lot of commerciaals too.

With my XM, I can listen to "ad free" music.....all day!!! Whereas on FM, before I bought and subscribed to the XM.....I would hear the same add 4 and 5 times an hour. One local station....99.9 offers.... so they say ad free music, BUT at the end of the time.....you get 10 - 15 minutes of ads....okay..commercials. I put up with it so I can hear the local news, but then turn them off and go back to my XM where I can listen to what I want, when I want and if music....no commercials.

Do not let these people destroy or even change this new technology.

I too said to myself when I first heard of XM radio.....who's going to pay for radio? Then one day.....I ordered a receiver, signed up for the service.....and from that point I was hooked.

XM is the future and I can see it growing. They offer a service to cut off channels you may not want your children to hear.

Keep XM as it is.....AND.....also allow them to expand. This is our future. I'm 58 years old.....I remember driving from coast to coast and in some areas not being able to receive a radio signal....driving for miles with just quiet....or static. Sure, it's possible to loose the signal at times, BUT not for long. When I go to my banks ATM.....which is covered...I do NOT loose the station..or XM...it still comes through.

XM is an advancement in technology.....do not send us back to the dark ages.

Thank you,

Michael P. Moore
